PESTROGEN regulation of tissue-specific expression of complement C3.";

J. Biol. Chem. 264:16947[1989].

C. -i- FUNCTION: C3 PLAYS A CENTRAL ROLE IN THE ACTIVATION OF THE COMPLEMENT SYSTEM. ITS PROCESSING BY C3 CONVERTASE IS THE CENTRAL CC REACTION IN BOTH CLASSICAL AND ALTERNATIVE COMPLEMENT PATHWAYS.

C. AFTER ACTIVATION C3B CAN BIND COVALENTLY, VIA ITS REACTIVE THIOLESTER, TO CELL SURFACE CARBOHYDRATES OR IMMUNE AGGREGATES.

C. -I- FUNCTION: DERIVED FROM PROTECLYTIC DEGRAPATION OF COMPLEMENT C3, C2.

C. -I- FUNCTION: DERIVED FROM PROTECLYTIC DEGRAPATION OF COMPLEMENT C3, C3.

C. C-I- FUNCTION: DERIVED FROM PROTECLYTIC DEGRAPATION OF COMPLEMENT C3, C3.

C. C-I- SUBULITIES CONTRACTION OF SMOOTH MUSCLE, INCREASES VASCULAR PERMEABILITY AND CAUSES HISTAMINE RELEASE FROM MAST CELLS AND C3.

C. SUBUNIT: C3 PRECURSOR IS FIRST PROCESSED BY THE REMOVAL OF 4 ARG RESIDUES, FORMING TWO CHAINS, BETA & ALPHA, LINKED BY A DISULFIDE BOND. C3 CONVERTASE ACTIVATES C3 BY CLEAVING THE ALPHA CHAIN, RELEASING C3A ANAPHYLATOXIN & GENERATING C3B (BETA CHAIN + ALPHA)

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           SUBUNIT: THE VIRION OF THIS VIRUS IS A NUCLEOCAPSID COVERED BY ILIPOPROTEIN ENVELOPE. THE ENVELOPE CONSISTS OF TWO PROTEINS: PROTEIN B. THE NUCLEOCAPSID IS A COMPLEX OF PROTEIN C AND MRNA.

MISCELLANEOUS: THE NONSTRUCTURAL PROTEINS NS1 PRESENTS TWO ALTERNATIVE CLEAVAGE SITES FOR ITS C-TERMINUS, WHICH MAY DEFINE SOLUBLE OR A MEMBRANE-BOUND FORM OF NS1.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              FUNCTION: THE SMALL PROTEINS NS2A, NS2B, NS4A AND NS4B ARI HYDROPHOBIC, SUGGESTING A POSSIBLE MEMBRANE-RELATED FUNCT: NS3 AND NS5 MAY PLAY A ROLE IN THE VIRAL RNA REPLICATION CATALYTIC ACTIVITY: Hydrolysis of four peptide bonds in the contract of the con
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             European
